

**S:**

HA is a 47yo female with PMH perforated diverticulitis with take down of colovesical and EC fistulas for which she had a Hartmann's Procedure 10 months ago, Atrial Fibrillation, and HTN. She is POD5 s/p elective Hartmann reversal with handsewn colorectal anastomosis with loop ileostomy, total abdominal hysterectomy, left salpingoopherectomy, and primary hernia repair. Complaining of slight pain/discomfort in abdomen at the incision sites. No overnight events. Patient endorses flatus. No nausea, vomiting, fever, chills.

PMH: Perforated Diverticulitis, Atrial Fibrillation, HTN

PSH: Laparoscopic Washout for Diverticulitis; Exploratory laparotomy and Hartman's with take down of colovesical, enterocutaneous fistulas, appendectomy, right oophorectomy

Allergies: NKDA

Medications: Apixaban Tablet 5mg Oral bid, Metoprolol XL Sustained Release Oral 25mg Oral daily

FHx: Non-contributory

SHx: Nonsmoker. No EtOH, illicit drug use.

**O:**

T 36.8C | BP 169/98mmHg | P 79 BPM, regular | RR 16 breaths/min, unlabored | SpO2 96% RA | W 97kg |

INS/OUTS:

-	7A-7P	24h	7A-
Ileostomy	630	250	880
Urine Voided	1100	1100	2200

Gen: Overweight female, sitting in chair next to bed. Appears her stated age of 47 years. AxO x3. No apparent distress.

CV: RRR. S1 and S2 are normal. There are no murmurs, S3, S4, splitting of heart sounds, friction rubs.

Pulm: Clear to auscultation and percussion bilaterally. Chest expansion symmetrical. No wheezing, rhonchi, rales, dullness.

Abd: Flat, symmetrical, soft. Minimal tenderness to palpation over incision sites. Ileostomy site is moist and red. Convatec moldable 57mm wafer and pouch attached. Green, liquid stool in pouch. Incision sites are well-approximated with minimal erythema, no swelling, no dehiscence. BS present in all four quadrants. No bruits over aortic/renal/iliac/femoral arteries. Tympanic to percussion throughout. No CVAT, guarding, rebound, organomegaly.

Extremities: No deformity or joint abnormality. No edema. Peripheral pulses intact. No varicosities.

**P:**

Labs:

- Repeat BMP, Mg2+ in AM

S/P Elective Hartmann reversal with handsewn colorectal anastomosis with loop ileostomy, total abdominal hysterectomy, left salpingoopherectomy, and primary hernia repair

- Acetaminophen Tablet 975mg Oral q6h
- oxyCODONE Immediate Release Tab 5mg Oral q4h PRN for pain severity 4-6
- oxyCODONE Immediate Release Tab 5mg Oral q4h PRN for pain severity 7-10

- Loperamide 2mg Oral q12h
- Magnesium/Aluminum Hydroxide Simethicone ES Oral Liquid 15ml Oral q6h
- Nystatin Topical Powder 1 application Topical tid
- Potassium Chloride Tablet 40mEq/dose Oral one time

#### Atrial Fibrillation

- Cont. Apixaban Tab 5mg Oral bid

#### HTN

- Cont. Metoprolol XL Sustained Release Oral 25mg Oral qd

#### Disposition:

- Anticipate to D/C home tomorrow with PO Acetaminophen, oxyCODONE
- Scheduled for f/u with Dr. Ricci and Dr. Foglia on 2/25/19
